

Intended Audience: Warren County Communications Center & the Boating Community

Marine Radio for Caesar Creek Monitoring

In time for boating season, Telecom has installed a marine radio at Caesar Creek, connecting the Warren County Communications Center with boaters and responders.

Dispatchers primarily monitor **Marine 16 (Emergency)** to hear distressed boaters. The state & federal agencies at Caesar Creek have agreed to check in with dispatch on this channel as well. Warren County has listening capabilities on **Marine 9 (Hailing)** to hear general water traffic but that is not routine. The radio can't scan so it will have to sit to one of the two talkgroups.

Watercraft Officers should have the marine talkgroup in their boat or portable radios and be able to respond to calls for assistance. Having this in the Warren County Communications Center will also bridge that gap when no officers are on the water; yet boaters still are.

If anyone has questions, please contact Telecom at 695-HELP or help@wcoh.net
Gary Branstetter with the United States Coast Guard Auxiliary is also a willing resource for questions: GBranstetter@sugarcreektownship.com
